

GET THE FACTS

# FINALLY – THERE’S AN EASIER WAY TO BUY NETWORK CONNECTIVITY

Traditional methods for buying wholesale connectivity, such as ASR Clearinghouses, emails, spreadsheets, and phone calls, have been the norm for decades. But, to meet customer expectations and stay competitive in today’s marketplace, it’s time to modernize and automate.

## Say farewell to those old-school ordering systems.

Neustar Universal Order Connect (UOC) is the new way to buy network connectivity. An API-driven, cloud-based platform, UOC automates and streamlines the entire process of buying wholesale network connectivity, even Broadband. From connecting buyers to hundreds of sellers and identifying the best quotes, to improving the entire order creation and submission process – UOC simplifies each critical step.

“Up to 5x faster processing times for new orders.”

- *GTT Communications*

## Reduce order delivery timelines, protect margins, and ensure an optimal customer experience.

Now you can turn quotes into orders more quickly and efficiently, determine if orders are on schedule, and analyze if suppliers are complying with contracted terms.

- **Benefit from a one-stop-shop for connectivity:** Centralized system for ordering any access type – Ethernet, Broadband, and more.
- **Prioritize your workload:** Filter by open order, due date, delays, or what needs attention now.
- **Streamline the ordering process:** Pre-populate orders by type and seller, and easily manage rules.
- **Make trouble reporting easy:** Fully integrated trouble ticket management for fast and complete resolution.

## ASR Clearinghouse vs. Neustar Universal Order Connect

PRODUCT FUNCTIONALITY	ASR CLEARINGHOUSE	NEUSTAR UNIVERSAL ORDER CONNECT (UOC)
<b>Single Interconnection:</b> Enable access to industry ecosystem with over 900 service providers through a single interface		
<b>Industry Compliant:</b> Support ASR, TM Forum, MEF and proprietary order formats	ASOG only	ASOG, MEF, TM Forum, and proprietary
<b>Enhanced Event Status:</b> Normalize status updates for a consistent experience, regardless of the service type	ASOG-compliant statuses	ASOG, MEF, TM Forum plus enhanced/ custom status notification support
<b>Advanced Reporting:</b> Track orders throughout the installation process and identify trends to inform decisions	Limited, ASR only	Advanced reporting features and dashboard
<b>Data Enrichment:</b> Enhance orders by activating modules that auto-generate or pre-populate specific data fields	ASR only	Advanced data enrichment from multiple sources and/ or custom business rules
<b>Simplified Ordering:</b> Connect trading partners and support natural language instead of complex industry jargon through single platform login		
<b>Centralized Circuit History:</b> Access everything in one place: supplier info, circuit type, bandwidth, install and upgrade dates		
<b>Robust Product Catalog:</b> Allow users to build each product specific to each order type, as well as interface with existing catalogs		
<b>User-friendly Workflows:</b> Automate complex business processes		
<b>Platform Extensibility:</b> Enable new functionality and integration with other BSS / OSS platforms via Open API's and standard interfaces
